Advanced Respiratory Systems

## Grab 'n Go® Vantage Respiratory System-Your Best Choice!

A patient is scheduled for a CAT scan. An oxygen cylinder is available, but no one can find a regulator or a wrench. The patient's test is delayed and radiology has to reschedule. The facility suffers lost time, money and quality of patient care. Don't let these types of oxygen-related transport delays happen at your facility.

Today, hospitals across the country are relying on convenient, easy-to-use, all-in-one oxygen cylinders. That's why leading hospitals are selecting the Praxair *Grab 'n Go*® Vantage Advanced Respiratory System as their cylinder of choice. An award winning design incorporates patented technology to put *Medipure*® medical oxygen at your fingertips when it's needed.

Whether you are looking to facilitate a rapid transport or you're in a primary care setting and need to respond to an in-office emergency, the Praxair *Grab 'n Go Vantage* system is your best choice.

**Grab hold of a proven, award-winning technology!**

*All in one...  
The one for all your  
portable medical oxygen needs.*

### Grab 'n Go Vantage System – a great idea from the top down

- **Ergonomic user-friendly integrated handle makes it easy to lift**  
An ergonomically designed handle makes the system easy to manage and transport.
- **Two convenient carrying handles**  
In addition to the ergonomic handle, the versatile *Grab 'n Go Vantage* system also includes a holding ring under the shroud – making it easy to lift from a carrier or cart.
- **Rugged Lexan® construction provides protection**  
A tough Lexan® plastic cover protects the regulator in the event of a drop or fall. This cover meets the DOT Drop Test requirement EN-738-3.
- **Easy to read and adjust flow settings**  
The snap-set flow-adjusting control knob allows you to control oxygen flow at settings most frequently prescribed.
- **Color-coded shroud and cylinder**  
Distinctive green color makes it even easier to select the correct unit and helps eliminate confusion in an emergency.
- **Active contents gauge**  
Pressure is indicated by means of an easy-to-read, built-in contents gauge continuously reporting the amount of oxygen remaining.
- **Regulator material machined from solid brass**  
Constructed from brass, the preferred material for oxygen regulator applications, the attached regulator eliminates the need to change-out cylinders. When the *Grab 'n Go Vantage* cylinder is empty, just return the entire system for a replacement.
- **Simplified inventory**  
Unlike other units, the *Grab 'n Go Vantage* system offers a single design to meet the special needs of adult and pediatric patients as well as patients requiring transport ventilators.

### MRI Compatibility

When ordered, the *Grab 'n Go*® Vantage system on an **aluminum cylinder** is certified MRI Conditional to 3-Tesla, when located outside the MR bore.

MEDICAL  
DESIGN  
EXCELLENCE  
AWARDS®

**2001 WINNER**

*“This is a well thought out product that can reduce patient aggravation...In addition to reducing costs, the product helps ensure safety by reducing potential hazards to patients.”*

– MDEA Jury

# The all-in-one *Grab 'n Go*<sup>®</sup> *Vantage* System

Praxair offers the complete *Grab 'n Go Vantage* Advanced Respiratory System as a single integrated unit. There are no parts to assemble or inventory to keep. NO TOOLS are needed.

Here's why *Grab 'n Go Vantage* has respiratory therapists, their patients and facility administrators all *breathing easier*:

- **Simplified training, FREE TRAINING VIDEO**  
One-knob operation makes *Grab 'n Go Vantage* the simplest medical oxygen equipment in the industry today. To reduce the learning curve further, we also offer a FREE how-to-use video so you can offer hospital in-service training on-line.
- **Use with ventilators**  
The *Grab 'n Go Vantage* system facilitates moving a patient with a ventilator. A 50 psig auxiliary connection to supply demand valves or portable ventilators delivers up to 100 lpm.
- **Less labor**  
Just pick up a *Grab 'n Go Vantage* system and turn the dial to the marked setting. You don't have to find a wrench and attach a regulator to the oxygen cylinder prior to use.
- **Reduced equipment costs**  
The cylinder does not require a separate regulator to be attached. This eliminates the need to purchase inventory, or to repair regulators for oxygen cylinders.
- **Meets emergency requirements**  
An inventory of *Grab 'n Go Vantage* systems gives you the supply of patient-ready oxygen needed to evacuate your facility in an emergency.
- **Standard E cylinder of medical-grade USP oxygen**  
Special lightweight construction:
  - When ordered with an aluminum cylinder, total system weight is only 12 pounds
  - The versatile *Grab 'n Go Vantage* System delivers from 0.5 to 25 lpm

**Call us today for more information: 1-800-PRAXAIR.**

\*The Praxair Advanced Respiratory System has been awarded a Medical Design Excellence Award (MDEA) in 2001 for achieving breakthrough advancements in design. MDEA jurors commented on benefits of the combined oxygen cylinder with built-in regulator and contents gauge.

*Designed to give caregivers  
an even greater hand.*

## GET YOUR FREE COST-BENEFIT ANALYSIS TODAY!

Your Praxair representative offers a FREE computerized presentation that gives you a cost-benefit analysis for *Grab 'n Go Vantage* Advanced Respiratory Systems. *The regulator and maintenance savings alone can offset the entire cost of the Grab 'n Go system program.* Additional savings include increased diagnostic revenues from more timely patient transport and a shorter learning curve for your staff.

Thousands of *Grab 'n Go Vantage* systems are in use at hundreds of health care facilities throughout the U.S. and Canada. These portable units are available from more than 300 Praxair locations in North America.
