

Praxair Cryomag Services: Your Trusted Source for NMR Cryogen Supply

Maintaining your nuclear magnetic resonance (NMR) system can be complex and requires time and effort. Praxair Cryomag Services understands what it takes to sustain the magnet cryogen level requirements and can assist you in providing magnet fills when and where you need them.

Experience You Can Count On

Praxair combines its global reach as a leading industrial gases supplier with a team of professionals dedicated to NMR superconducting magnet technology. We perform thousands of transfills per year efficiently and reliably. We also assist in freeing up our customers' time to focus on more important tasks, such as their scientific studies.

With Praxair, customers will benefit from decades of experience and commitment to helium and nitrogen transfills.

Choose a Leader

NMR systems are an expensive investment and crucial to maximizing lab operations. Choose an experienced, leading supplier. Praxair offers you:

- Helium supply, distribution, and processing technology provided by a single source
- Experience in helium, nitrogen, and rare & specialty gases
- Professional product delivery and transfill services

Flexibility When You Need It

When it comes to supplying cryogens and transfills, Praxair Cryomag Services has over 20 years in the NMR industry. In addition to providing products and services, Praxair also works with your operations and financial team to avoid any interruptions.

- Plan your transfills around your schedule, deliveries around the clock
- Customer service, 24 hours a day, 7 days a week
- Payment option offerings — annually, monthly, or per fill — as needed

We'll always be there when you need us — so you can deliver to those who need you!
