SECURASTOCK™ products from Linde help you reduce costs while improving efficiency and profits.

SECURASTOCK™ Vending Machine

SECURASTOCK™ Vending Machine

Industrial vending has become increasingly popular over the last few years. However, tradiitonal vending machines can be complex, difficult to maintain and require significant space. SECURASTOCK™ vending machines are greatly simplified, and with less space dedicated to mechanical parts and systems, they can hold as much inventory as four traditional machines.

SECURASTOCK vending machines replace up to four traditional machines and can help significantly reduce dispensing costs. It can hold up to 200 unique items and as many as 2,000 individual pieces.

SECURACRIB™ Vending Machine

SECURASTOCK provides SECURACRIB™ point-of-use control systems, allowing you to convert any room, area, container or trailer to an automated inventory control storeroom with RFID and VMI/CMI APP solutions for inventory management. SECURASTOCK equipment and supporting software helps automate the management of material storage and movement throughout your entire facility, inside or outside - with no product size or shape limitations.
