

# GRAB 'N GO® Vision - Leading the Way Medical Oxygen USP Gas Delivery System

## Introducing GRAB 'N GO® Vision

Linde's GRAB 'N GO® Vision, our newest portable oxygen USP system, features practical technology. A modern streamlined design includes an angled luminescent gauge to easily determine cylinder content, even in low light, reducing the possibility of product outages during transport.

The GRAB 'N GO Vision system provides metered flow rates from 0.25-25 liters per minute and a constant 50 psi connection to supply auxiliary equipment making it ideal for use by healthcare professionals in a variety of settings including: hospitals, skilled nursing and long term care facilities, surgery centers, as well as dental and medical practices.

## Features and Benefits

Features	Benefits
<p><b>Convenience</b></p> <ul style="list-style-type: none"> <li>→ Angled gauge</li> <li>→ Luminescent gauge</li> <li>→ Integrated flowmeter</li> <li>→ 50 psi auxiliary outlet</li> <li>→ Barbed outlet</li> </ul>	<ul style="list-style-type: none"> <li>→ Visibility from top and front</li> <li>→ Easy to read in low light environments</li> <li>→ Open and set flow with one knob operation</li> <li>→ Ready for use with other ventilation devices</li> <li>→ Flow Settings 0.25, 0.50, 1, 2, 3, 4, 6, 8, 10, 15, 25</li> </ul>
<p><b>Safety</b></p> <ul style="list-style-type: none"> <li>→ Built-in relief valve</li> <li>→ MR Conditional</li> <li>→ Durable, protective shroud</li> </ul>	<ul style="list-style-type: none"> <li>→ Close off flow and isolate relief valve in one operation</li> <li>→ Up to 3.0 Tesla MRI environments</li> <li>→ Protects valve and regulator</li> </ul>
