

Full Plant and Area Solutions

Praxair helps customers reduce the number pollutants entering the workspace air—and the air outside.

Camfil Air Pollution Control

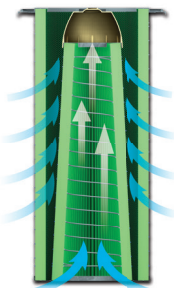

Fume and Dust Collectors

Maintaining air quality, a clean workspace, and employee health are critical to productivity. Designed for pollution control and product recovery, Praxair offers a range of equipment to help you quickly resolve your plant's dust, fume and mist problems. Our advanced filtration technologies deliver high-efficiency in a filter that lasts longer than competitive products. Cost-efficient motors combine high performance with low energy consumption.

ProStar Gold dust collection systems deliver premium area-wide performance and safety.

Advanced dust collector filtration options offer efficiencies that exceed 99.99% at 0.5 microns.
